

SSD in Enterprise Storage

Hubbert Smith

Director,

Enterprise Storage Marketing

Samsung Semiconductor, Inc.

New Dynamics in the Storage World

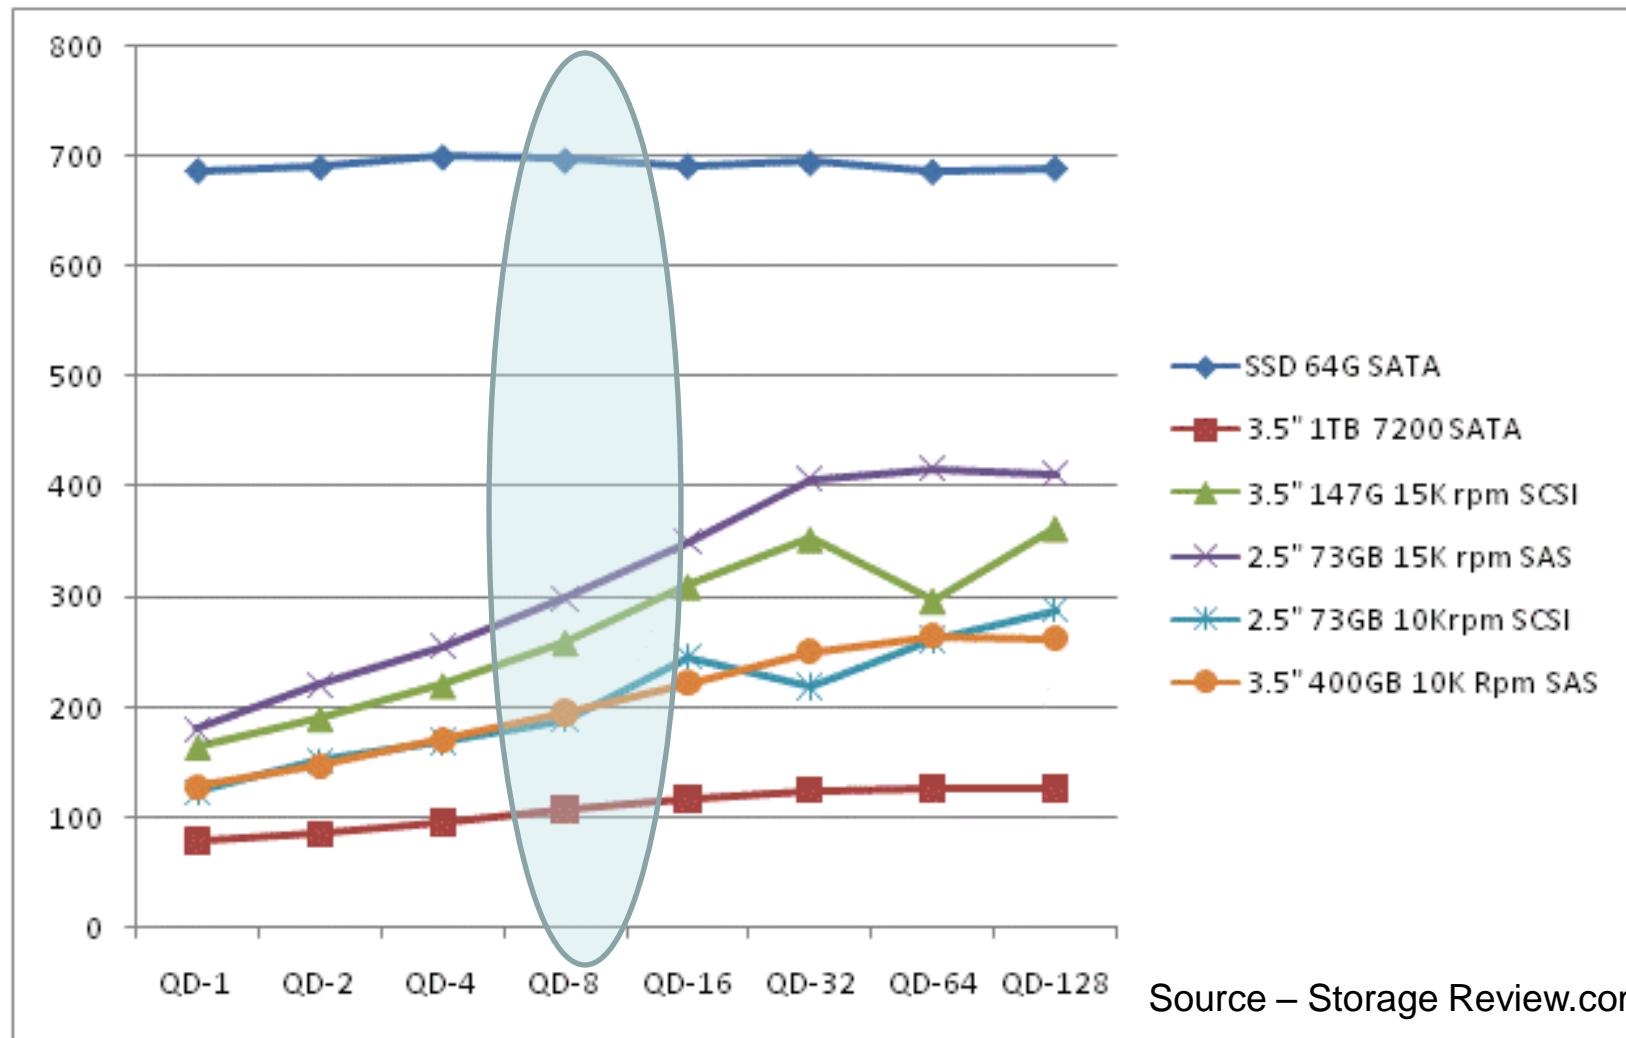

A.k.a. – What problem are we trying to solve?

Creating Content – Finding/Storing Content – Buying/Consuming Content
What Matters ? ... BOTH Storage Performance and Storage Capacity

Storage Performance (IOmeter FileSerever)

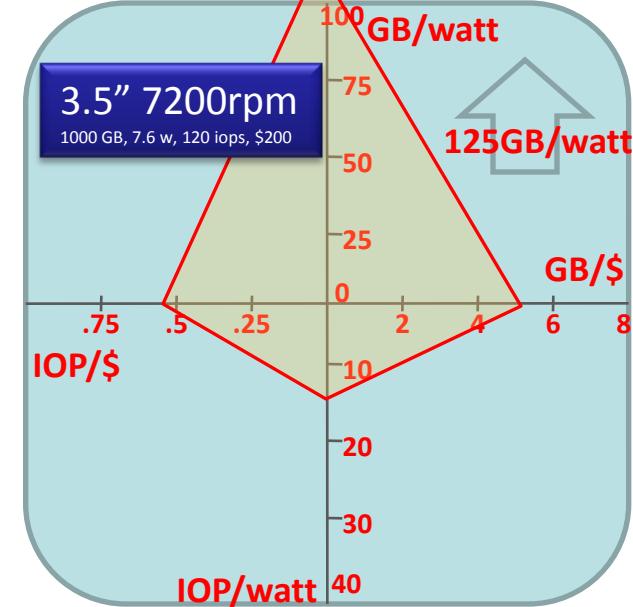

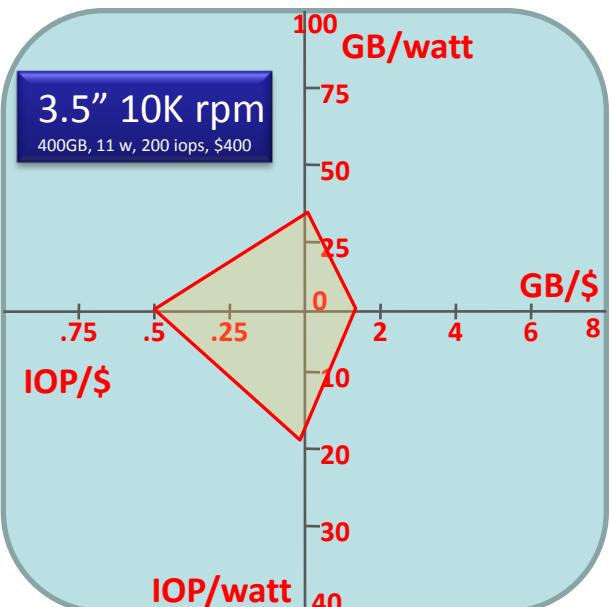

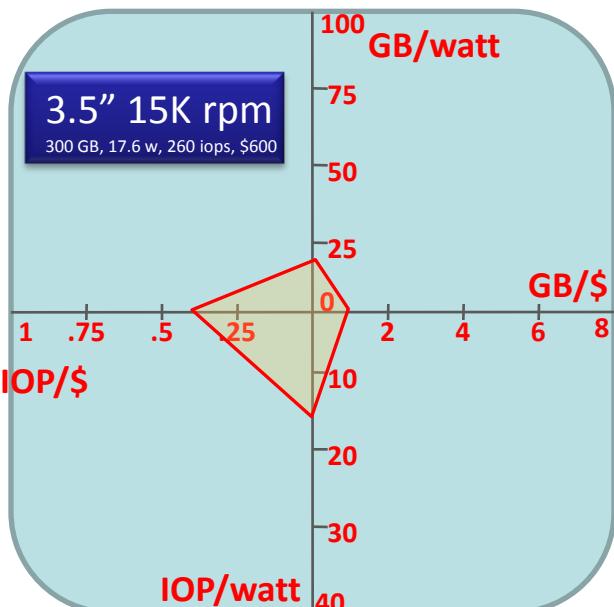

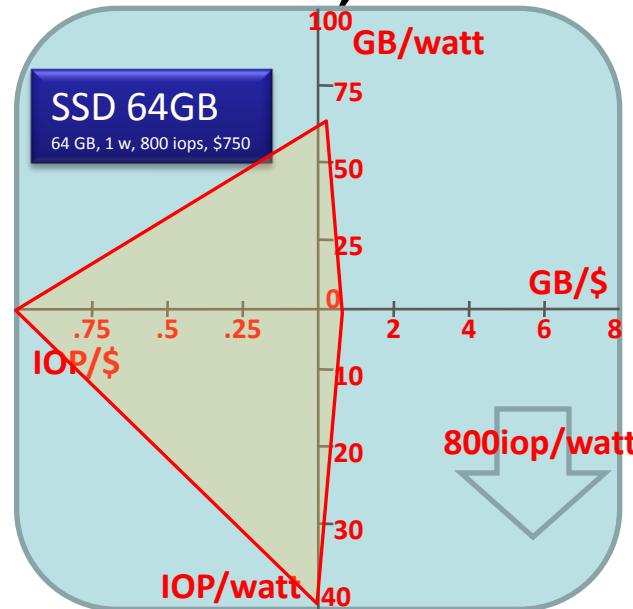

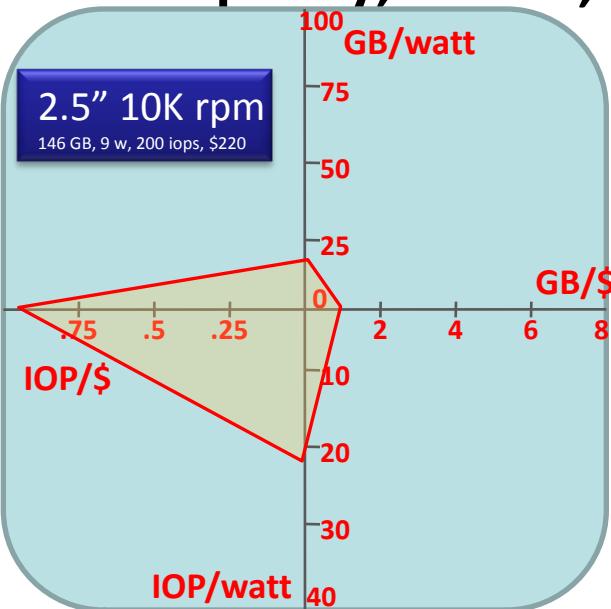

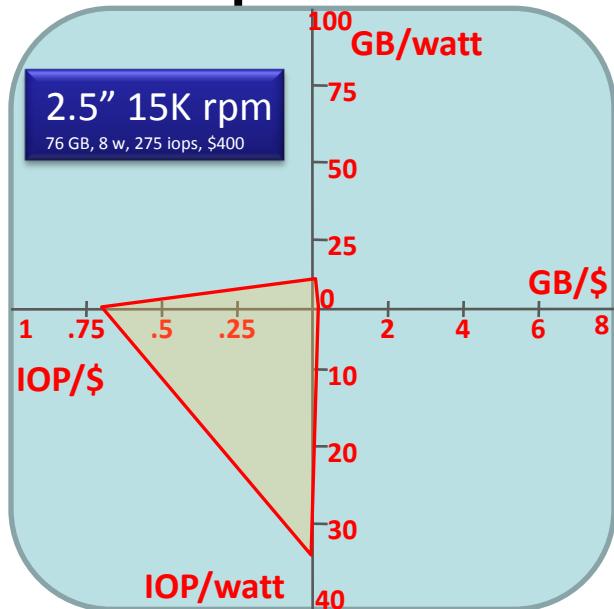

Clear, real-world Storage Performance
Our customers deserve clarity

Samsung Storage...at the speed of imagination

Squeeze the Balloon – Capacity, Power, Performance, Price

Enterprise Storage: IOP/\$ and GB/\$

800iops/\$750
SSD (64G)

Samsung Storage...at the speed of imagination

Enterprise Storage: IOP/watt and GB/watt

Case Study

- Internet Service Provider - medical office software (real)
- Workload is mostly database – scheduling, billing, insurance claim processing. Very limited scanned documents
- 3,000 to 5,000 simultaneous users
- Capacity: **8.6 TB** - 60 drives – 15,000 rpm
- Storage Performance: **12,000 IOPs** at typical Queue depth of 8

15K rpm (PO)		
IOP/watt	15.1	bad
IOP/\$	0.29	bad
GB/watt	8.7	bad
GB/\$	0.16	bad

TCO		
initial cost \$	52,257	bad
power \$	4,892.43	bad

SSD (PO)		
IOP/watt	376.0	very good indeed
IOP/\$	1.00	very good indeed
GB/watt	38.5	good
GB/\$	0.10	bad

TCO		
initial cost \$	83,984	not so good
power \$	1,100.80	good

SSD + 7200 1TB (PO + CO)		
IOP/watt	28.4	good, 2x 15Krpm
IOP/\$	0.31	OK, same as 15Krpm
GB/watt	83.5	very good indeed
GB/\$	0.91	very good indeed

TCO		
initial cost \$	38,824	good
power \$	2,081.72	good

(PO) = Performance Optimized
(CO) = Capacity Optimized

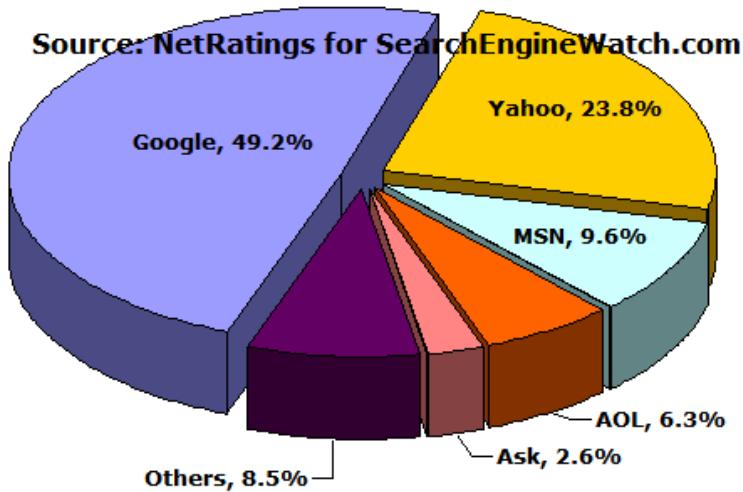

Samsung Storage...at the speed of imagination

Conclusion

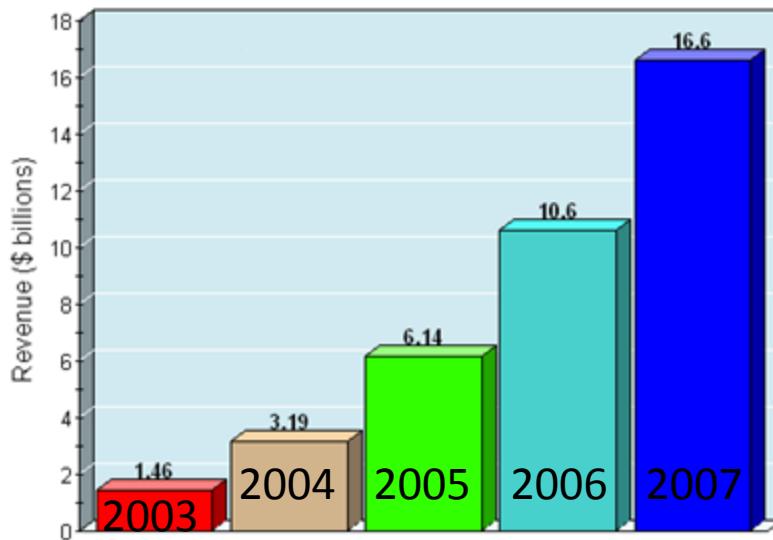

- Enterprise SSD Drivers –
 - User experience – business need to capture users (ad based), good user experience drives market share
 - Economics – the business need to deliver affordable performance and affordable capacity and low power
- Enterprise SSD Enablers –
 - PO/CO – performance optimized and capacity optimized storage with logic or processes to manage the hot data and cold data
 - SATA Enterprise adoption was the dress rehearsal for SSD adoption
- Call to action –
 - Be good to our customers through consistent use of KPC: IOP/\$, IOP/watt, GB/\$, GB/watt and simpler storage performance

**SSD adoption drivers – User Experience, Economics and PO/CO
SSD(PO) adoption requires a bookend: 1TB 7200rpm (CO)**
